**Detailed Action**

1. This office action is for amendment filed on 6/21/2007.

**Claim Rejections - 35 USC § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For each independent claim 1, 6, 12, there is no sufficient structural linkage in the claim to support the "transmits the CQI based on the repetition count information to the communication party with priority", in order to utilize such structure to retrieve the information from the memory, to prepare the modulated radio signal, based on the CQI update cycle and the repetition count information stored in the memory, for transmitting of the CQI from transmitter.

For each independent method claim 14-15, there is no recitation of any method steps according to the U.S. format, in the claim, which uses the word such as " the method steps comprising:" or "comprising the steps of:" for the steps which are sequentially formed to perform the claimed limitations.

The dependent claims are also rejected due to their dependency upon rejected independent claims above.
